LID PUNCHING MACHINE

Lid punching machine SW-series can punch lids, laminated lids, deep drawn lids and etc. from roll form of printed materials.

Model	Max. web width	Thickness	Max. speed / min.
SW-300*	300mm	0.030mm ~ 0.2mm	200 strokes
SW-450*	450mm		
SW-550*	550mm	0.050mm ~ 0.2mm	180 strokes
SW-700	700mm		150 strokes
SW-900	900mm		

* These models can punch embossed lids.

PUNCHING TOOL

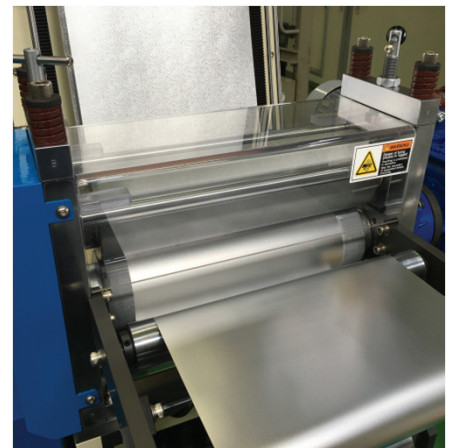

Punching tool is made as per customer's printing design.

*** Structure**

Punch(male) & Die(female)

*** Life time**

Max. 180 million strokes

EMBOSSING UNIT

Embossing unit makes various embossing patterns on the aluminum lids.

*** Pattern**

Earthworm, Both side pin-dot, Cross stripes and etc.

LABEL PUNCHING MACHINE

Label punching machine can punch various labels from roll form of printed materials. Ionizer (Anti-static bar) is installed on the machine to remove statics on the films. The machine can be made as per customer's product sizes.

Model	Max. punching size	Speed / min.
Custom-made	1,000mm(width) & 450mm(length)	40 strokes ~ 180 strokes as per product's size

* Application

In-mould labels, Blow-mould labels, Cheese labels, Beer labels, Big size in-mould labels(max. width 1,000mm).

Blow-mould label

Detergent, Cosmetic, Oil

Paper label

Beer(front, back, neck), Cheese

In-mould label

Coffee, Juice, Biscuit

Perforated PET by PERFORATING MACHINE SWC-series

Perforating machine SWC-series can make perforated lines on the flexible packaging materials.

Model	Max. web width	Max. web diameter	Materials	Max. speed / min.
SWC-800	800mm	500mm	PET & etc.	180 strokes with 105mm length
SWC-1200	1,200mm			

Machine specification

Electrical

220V, 50/60Hz, 3Phase

Power consumption & Air supply

3~7Kw, 2.94 Bar

Control system

Servo motor, Servo drive, Powder brake & clutch,
Mark sensor, Photo sensor, Proximity sensor,
Tension controller, Touch screen console

Optional items

E.P.C. unit (Web guide), Missing lacquer scanner,
Transformer
